About 3,400 airports designated as part of the national airport system are eligible to receive ARRA funds. The FAA is moving swiftly to work with airport sponsors to ensure eligible projects have completed or nearly completed, design and planning requirements.

Under ARRA, the FAA received \$1.1 billion to allocate to qualified airports on a discretionary basis. That funding will be distributed based on a project priority system that addresses airport safety and security, infrastructure, runway safety, increased capacity, and mitigation of environmental impacts.
